

We are pleased to announce the

FIRST

CALIFORNIA CAST METALS INDUSTRY
GOVERNMENTAL AFFAIRS CONFERENCE

Hotel Senator
Sacramento, California
March 20 & 21, 1973

This important conference is being co-sponsored by the four major trade associations listed on the left.

The conference is an outgrowth of the unified governmental affairs activity in which our trade associations have been involved the last several years - and the Washington conference held in January of this year. The unified program has been effective - and the Washington conference quite successful. However, it has become apparent that to become completely effective, we must also operate at the STATE level. We must impress upon our legislators and officials the facts concerning the size, strength, and importance of our industry. They don't know us. They must be made to know us. This conference is the medium we will use.

Your attendance along with others in top management from your company is a must. An assessment of \$50.00 for one, \$20.00 for each additional, and \$12.00 for extra dinner guests is necessary to cover dinner expenses of our guests, YOUR LEGISLATORS.

The program has an evening function plus a time period on Wednesday in which legislators and agencies can be visited.

We suggest that you make an appointment to visit your congressmen and invite them to the reception and dinner. A California legislative directory will be mailed to all registrants.

THE BUSINESS YOU SAVE MAY BE YOUR OWN!!!!

Sincerely,

ATLAS FOUNDRY & MFG. CO.
