## **ABOUT MARCH 10th WEBINAR:**

It takes top-of-the line fire protection equipment to protect people and assets at industrial facilities. The California Metals Coalition (CMC) is hosting a webinar on Tuesday, March 10th to provide metal companies with timely information, insight, and potential solutions for fire protection.

## **FEATURED SPEAKER: Nick Novotny of Elkhart Brass:**

CMC-member Elkhart Brass is an expert in the field of fire protection. Nick Novotny of Elkhart Brass will cover information on fire suppression equipment such as automated electric monitors that protect defined areas and assets while keeping people safe. This will include various monitors, nozzles, valves, and remote control options that are tailored to each individual application. Correct water pressures to supply firefighting efforts, and handline nozzles to deliver effective fire flows, are also key issues.

## **CASE STUDY: SA RECYCLING:**

CMC-member SA Recycling will be providing a case study on how they analyzed and implemented solutions for fire protection at their metal recycling and metal shredding operations at Terminal Island.

## **PRE-REGISTRATION:**

The webinar is a free event, but pre-registration is required to receive the Zoom link. [CLICK HERE to register](#). If you have any questions, please call CMC at 916-933-3075.

**ABOUT CMC:** The California Metals Coalition (CMC) is a statewide trade association with members representing nearly all sectors of California’s metalworking industry. CMC provides information in an open setting to exchange information on the most important issues currently impacting California’s metals industry. CMC meetings are concise, direct and valuable to all attendees. Learn more about CMC at: [www.metalscoalition.com](http://www.metalscoalition.com).
